Response to Arguments

1. Applicant's arguments, see remark, filed on 2/2/06, with respect to claims 1-14,32-35 have been fully considered and are persuasive. The former rejection of claims 1-14, 32-35 has been withdrawn.
2. Applicant's arguments filed on 2/2/06 with respect claims 19-21,28-31,35-39 have been fully considered but they are not persuasive. Method claims are considered obvious over the co-pending application 2004/0163641 A1 because the use of "valve" structure, which distinguishes apparatus claims from the apparatus claims of the co-pending application, is not clearly established in the method claims.

DETAILED ACTION

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3743

4. Claims 19,28-31,38, and 39 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 16-30,48-64 of copending Application No. 2004/0163641. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method steps as claimed are considered obvious over what is being claimed in the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 19,28-31,38, and 39 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 29-44 of U.S. Patent No. 6,830,046B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method steps as claimed are considered obvious over what is being claimed in the cited Patent.

Allowable Subject Matter

6. Claims 1-14,32-35 are allowed.

7. Claims 20,21,36, and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
